

BRAND- BOOK

**“Engineering
creates the future.”**

About Us !

Nesto Machine was established in 2016 and has become one of the leading companies in the woodworking machinery sector over the years. We manufacture wood turning machines, CNC machining centres and industry-specific machines; each product is developed to meet the highest standards in the industry.

Our

OUR VISION

To help our customers increase their production capacity and achieve their sustainability goals by providing innovative solutions to the wood processing industry worldwide.

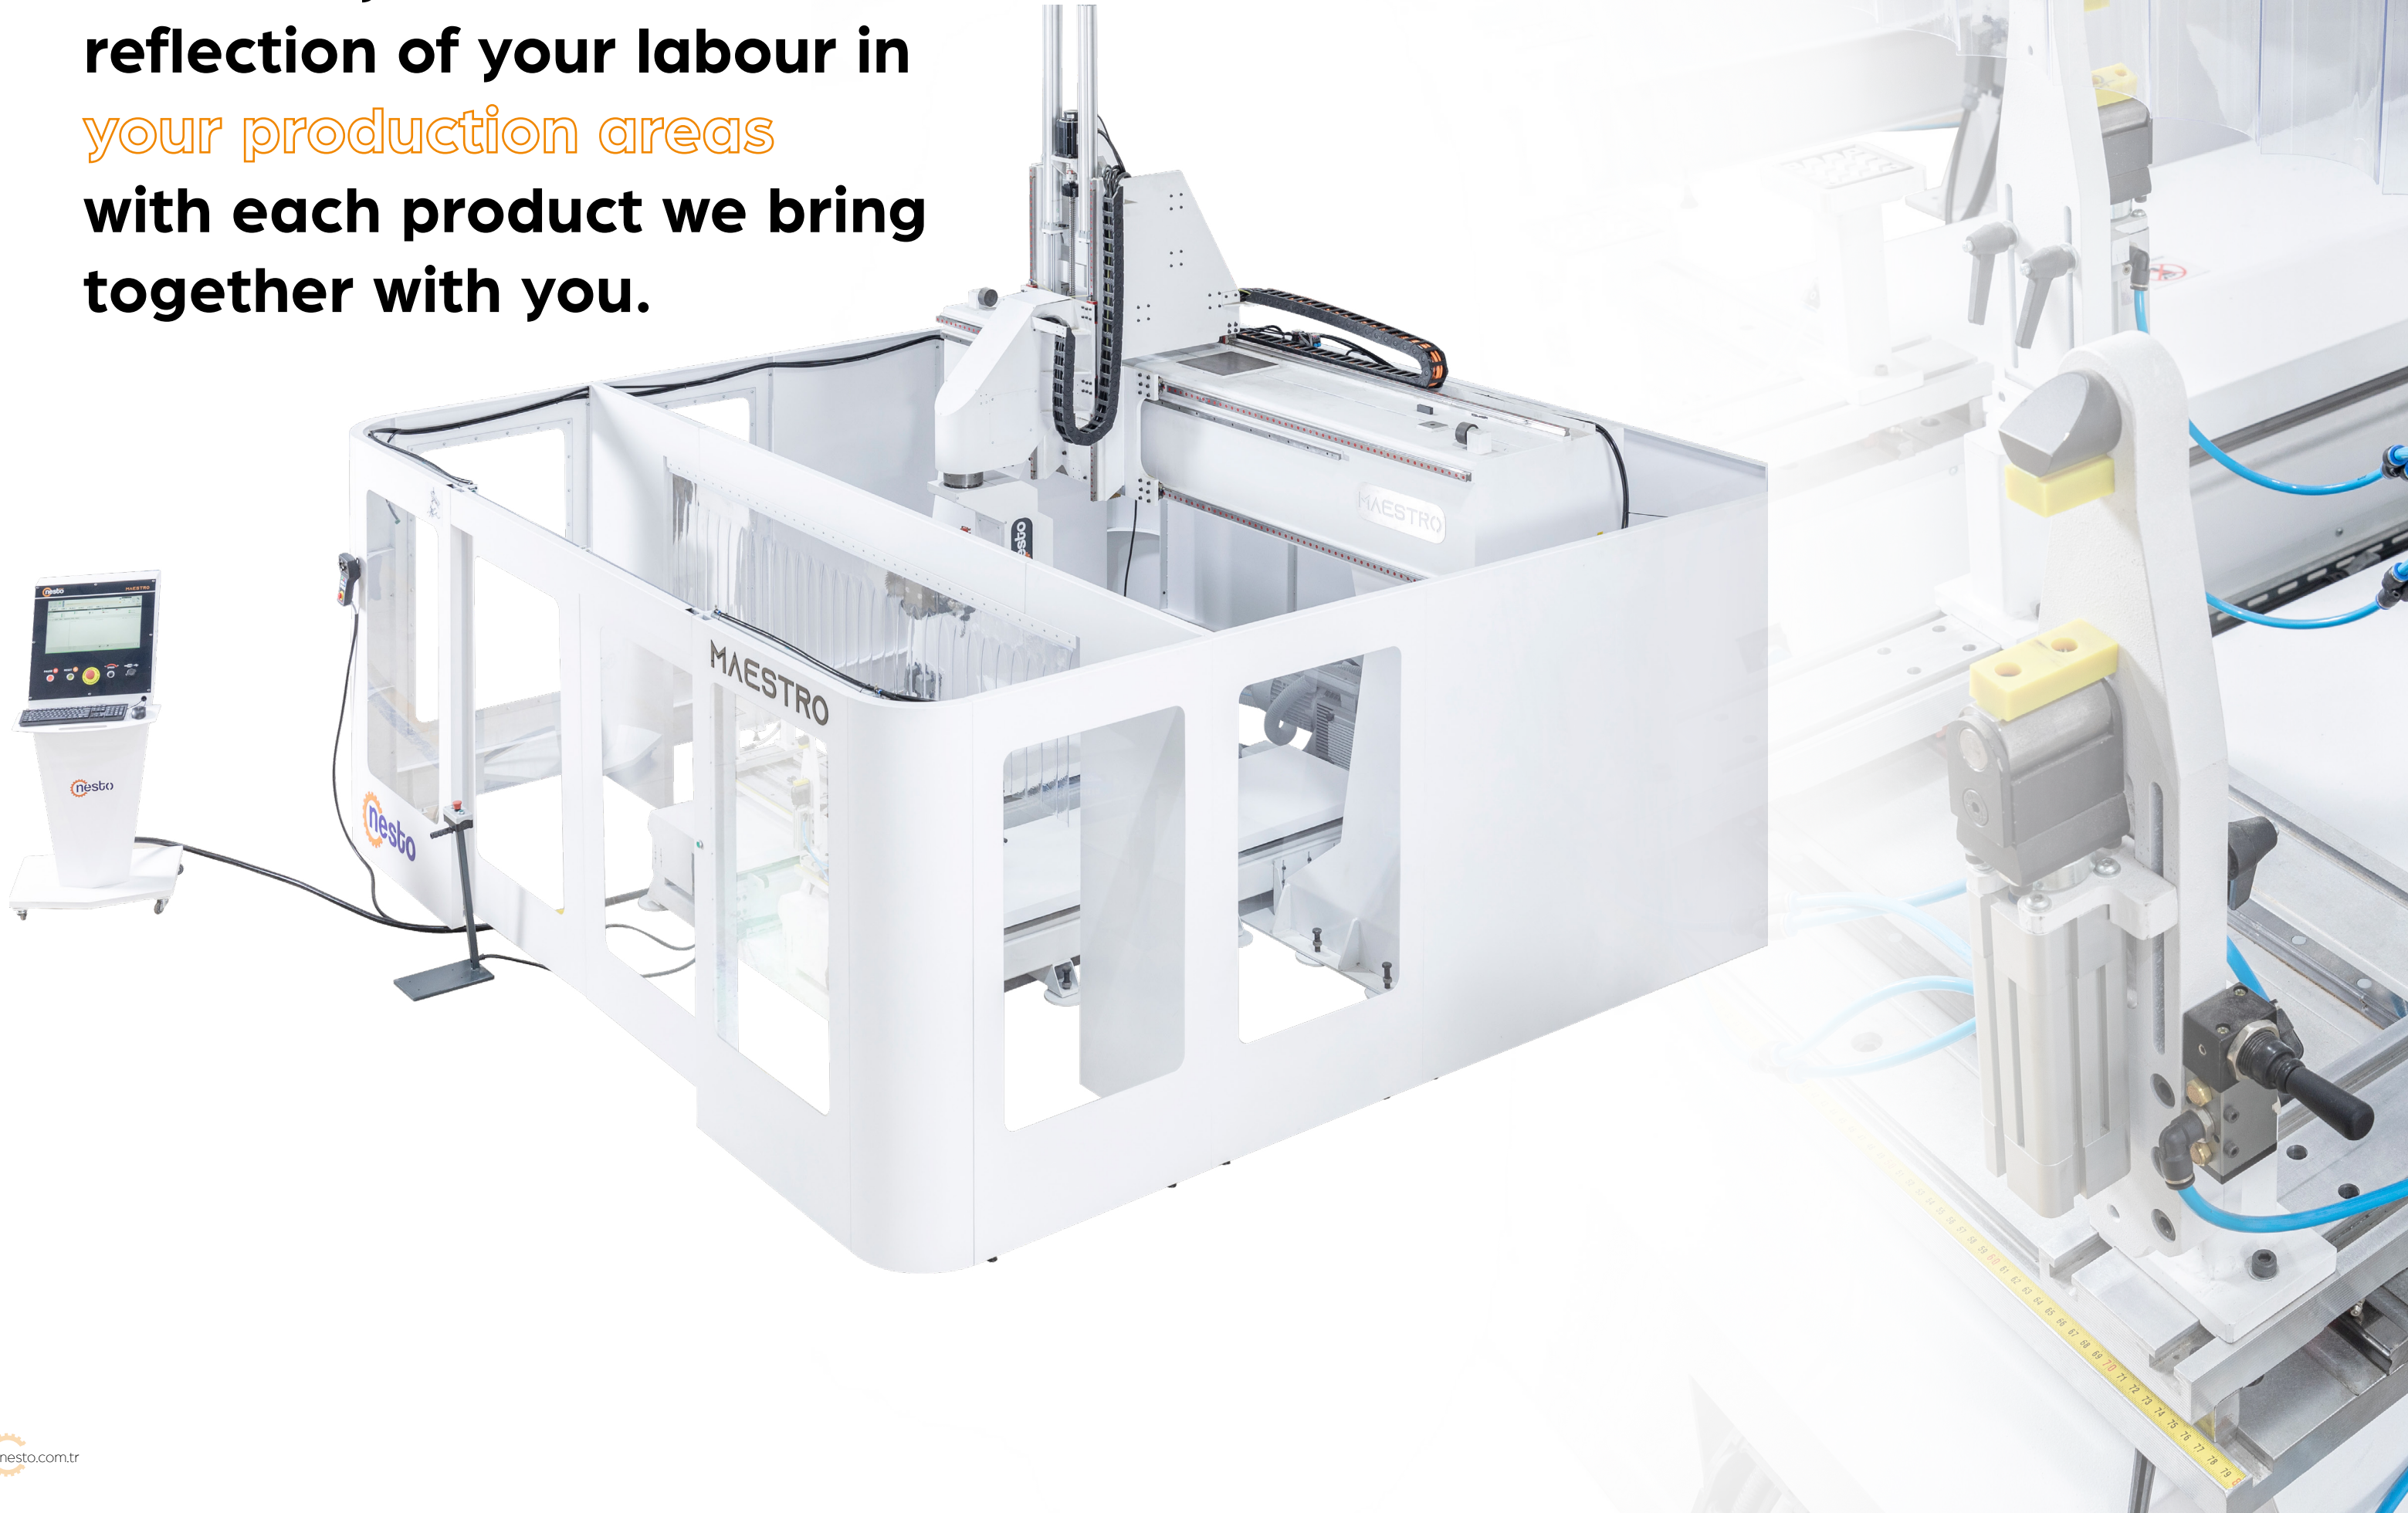

OUR MISSION

As Nesto Machine, to develop reliable and innovative products that aim to keep customer satisfaction at the highest level. To add value to our customers and our planet by prioritising quality, safety and environmentally friendly practices in our production processes

MARKET POSITION

With many years of experience in the industry, Nesto provides a competitive advantage through superior engineering and design capabilities. We are recognised for our innovative and high-performance machines in markets around the world, including Europe, Asia and North America.

**We wish you to see the
reflection of your labour in
your production areas
with each product we bring
together with you.**

Techno- logical Innova- tions

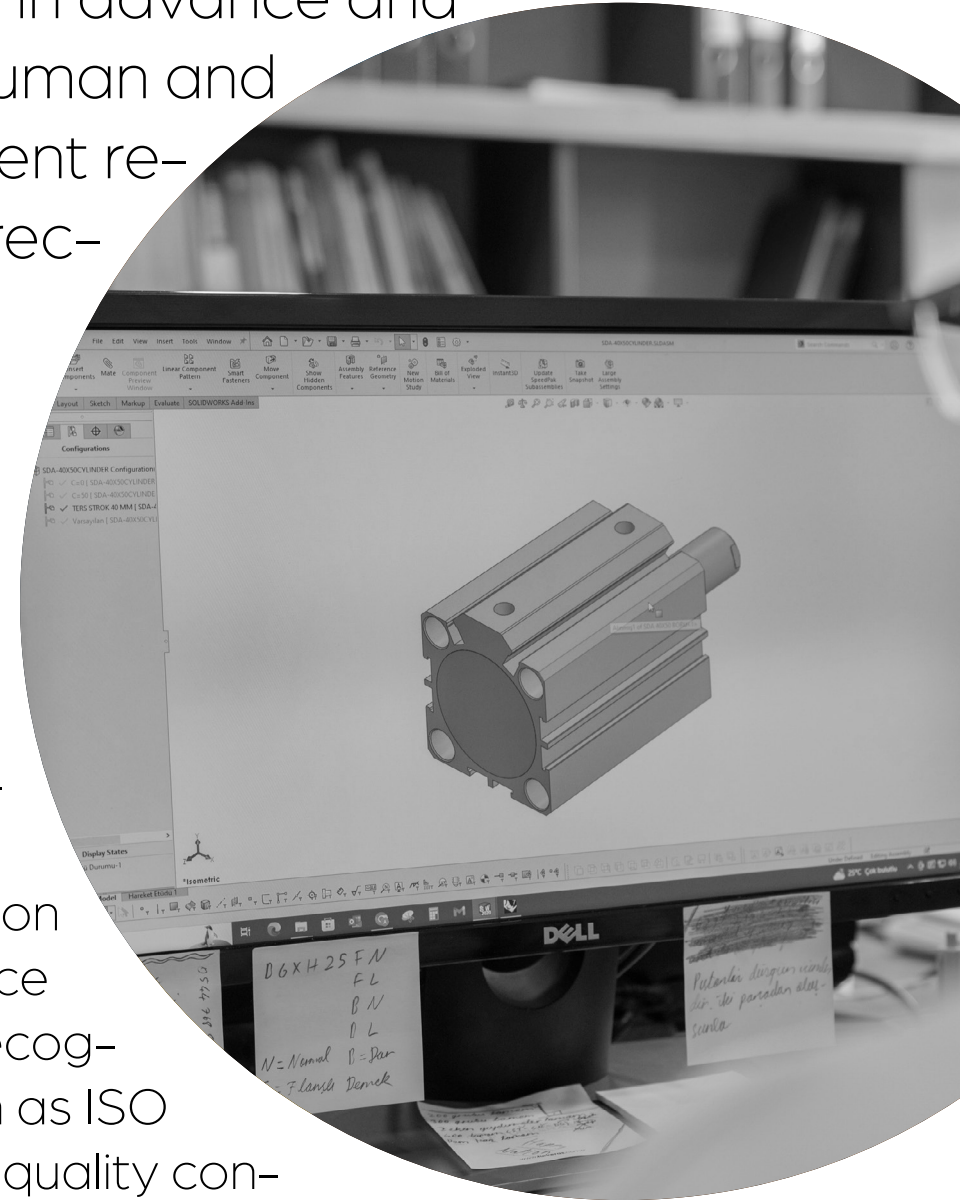

As Nesto Machine, we closely follow the technological developments in the sector and integrate innovative solutions into our products.

We try to be a pioneer in the integration of new technologies into our machines by trying to read the future perspective of our sector in advance and channeling our human and machine equipment resources in this direction.

Quality Management Systems

Nesto Machine prioritises quality at every stage of the production process. In accordance with internationally recognised standards such as ISO 9001, we apply strict quality control and assurance methods in all processes from design to delivery of our products. Our continuous improvement approach aims for excellence and aims to achieve better every day.

As Nesto Machine, we work with a team of 55 people in our 4.500m2 facilities located in Inegöl/Bursa.

Our welding, machining, painting, assembly and automation departments ensure that our production processes are more measurable and under control, allowing us to serve our customers on the day and in the fastest way.

Production Lines

Materials and Pro- duction Technolo- gies

The raw materials we use are selected in accordance with high quality standards.

Our innovative production technologies minimise material waste, reduce environmental impact and increase cost efficiency.

In addition, thanks to the fact that all processes from A to Z are within our structure, we provide the advantages of being an integrated facility to all our stakeholders in the services and products they receive.

Energy efficiency and minimum waste are prioritised in our production processes.

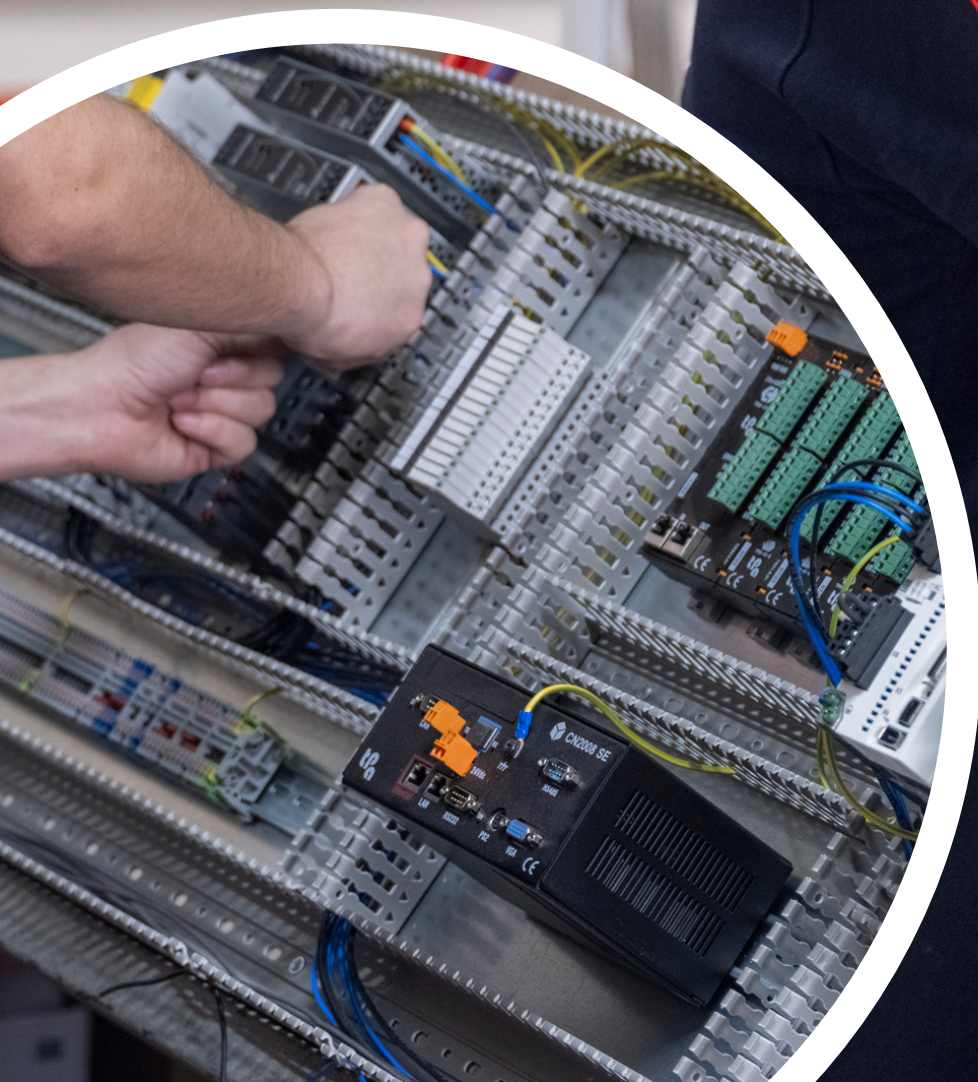

Our quality control systems ensure a high level of quality and reliability at every stage of the production process. Thanks to our P&D programmes, we are able to rapidly integrate technological innovations into our production process and thus achieve highly adequate results in terms of meeting the needs of the products we put on the market.

Customer Oriented – User Friendly

Each of our products is equipped with computer-based control systems to provide an easy-to-use and efficient operational experience. Remote control capability enables our technical support team to communicate instantly with our customers so that any problems can be resolved quickly. With advanced reporting tools, the performance of the machines is continuously monitored and optimised.

While presenting each component we bring together, we contribute to the process of realising a dream.

Facilitative, Functional and Solution Orientated

Customer Orienta- tion and Satisfac- tion

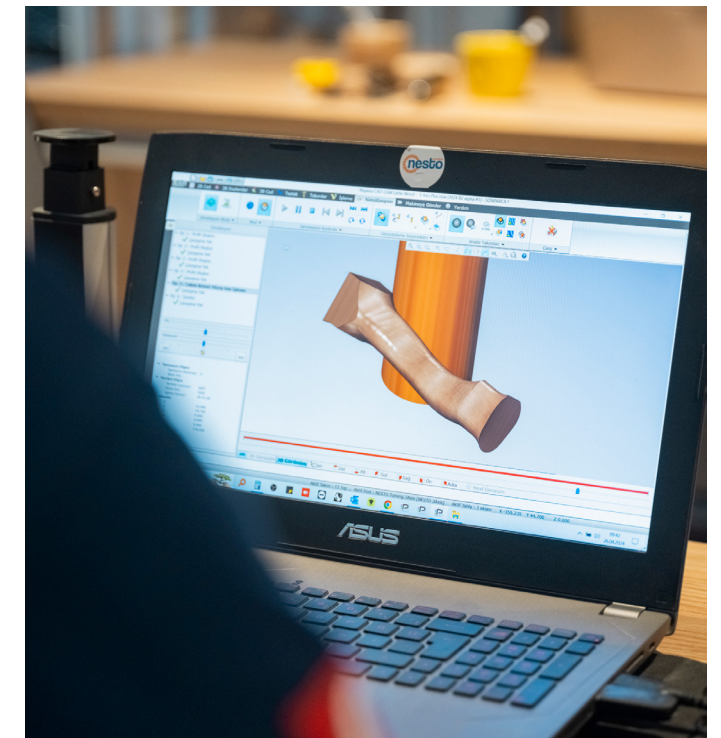

As Nesto Machine, customer satisfaction is always our priority.

Any feedback from our customers is taken as an opportunity to improve our services and products. Our customer service team is continuously trained to respond quickly and effectively to all kinds of questions and requests.

After Sales Services

We stand behind our products and offer comprehensive warranty services for every machine purchased. Furthermore, an extensive spare parts network and regular maintenance services ensure that our customers machines operate at peak performance for a long time.

Technical Support and Training Services

...we offer various training materials and user manuals.

In order for our customers to use our machines in the most efficient way,

we provide detailed product usage training. Both through our on-line platforms and in person, our technical support team is always ready to help. We

also offer a variety of training materials and user manuals to encourage continuous learning and development.

Product Safety and Compliance with Standards

Nesto Machine prioritises quality at every stage of the production process. In accordance with internationally recognised standards such as ISO 9001, we apply strict quality control and assurance methods in all processes from design to delivery of our products. Our continuous improvement approach aims for excellence and aims to achieve better every day.

Tenon and Female Tenon Machines, especially CNC Wood Lathe Machines, and we carry Nesto's customer-oriented service approach to all over the world.

We export machines to all over the world!

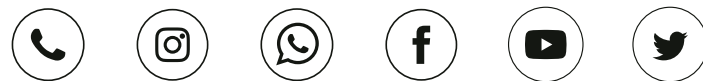

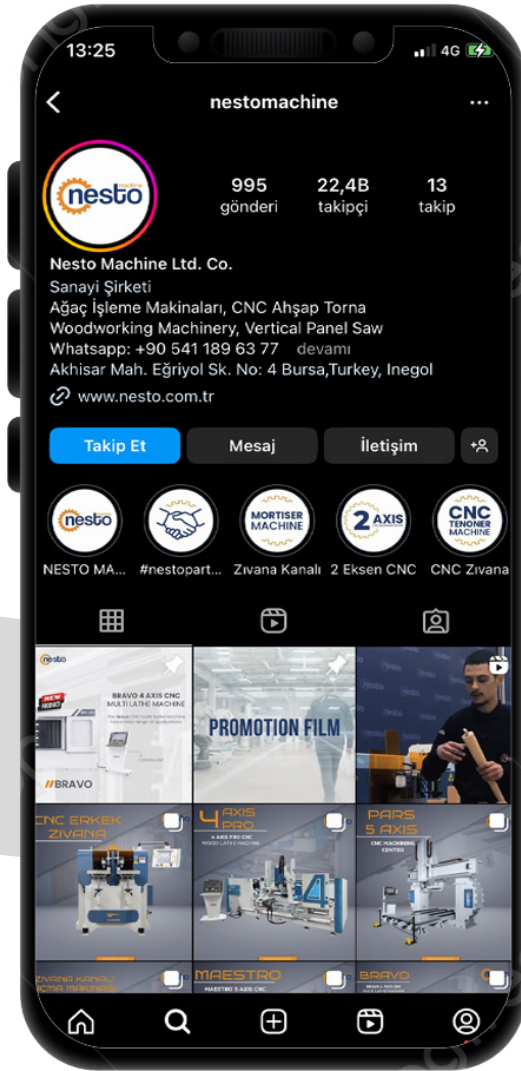

Compliance with Industry Standards

Competitiveness in international markets requires compliance with high standards and strict regulations. Nesto Machine operates safely in global markets by providing mandatory certifications such as CE. It also aims to protect the environment and reduce operating costs by developing energy efficient machines for environmental sustainability.
